

What I Believe: An Engineer and Mathematician Looks at Life

By Richard Michael White

AuthorHouse. Hardcover. Book Condition: New. Hardcover. 200 pages. Dimensions: 9.0in. x 6.0in. x 0.6in. This book is a blue print on the steps that must be taken to make America great again. It addresses Americas problems from war to health care; from energy and nuclear power to global warming; from illegal immigrants to reinstitution of the draft of all young Americans; from a national registration system for all Americans to a practical solution to the financial difficulties of Social Security. The views and solutions to these problems are expressed through the eyes of Richard Michael White, a seventy-one year old man who holds advanced degrees in both engineering and mathematics. As Richards life progresses from being a student in high school, to serving as an Army Officer on active duty, to a thirty year professional career, to his eventual, early retirement at the age of fifty-seven, his view of Americas most pressing problems changes and solidifies into a coherent and detailed plan on solving these problems. The book begins as Richard describes the differences in the current world from 1957 when he graduated from high school to the present. He discusses Christianity and concludes that he might, or might not, be...

Reviews

Most of these ebook is the best publication available. It is definitely simplistic but unexpected situations within the 50 percent of the book. You will not sense monotony at any moment of the time (that's what catalogs are for relating to in the event you request me).

-- King Wunsch

Undoubtedly, this is actually the best operate by any publisher. It is among the most amazing pdf i have got read. Its been printed in an exceptionally straightforward way which is just after i finished reading this book in which actually altered me, change the way i believe.
