

Mathematical Questions and Solutions in Continuation of the Mathematical Columns of The Educational Times Volume 4 (Paperback)

Filesize: 8.77 MB

Reviews

This pdf is really gripping and fascinating. It is actually full of knowledge and wisdom I am just delighted to tell you that this is the very best pdf i have got study during my very own daily life and might be he finest pdf for actually.

(Ms. Althea Kassulke DDS)

MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES VOLUME 4 (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1866 Excerpt: .than a, the symbol $f(a, ft)$ expresses an inferior limit to, $f(x)$ for all values of x between a and ft; so that, when x is thus restricted, $f(x)$ must always be greater than the positive quantity $f(a, ft)$, and cannot, therefore, be equal to zero. Next, let $f(a, A)$ and $ft-a$ be both negative. In this case, A being less than a, the symbol $f(a, A)$ expresses a superior limit to $f(x)$ for all values of x between a and A; so that when x is thus restricted, $f(x)$ must always be less (algebraically) than the negative quantity $f(a, A)$, and cannot, therefore, be equal to zero. The terms superior and inferior are, of course, used in their algebraic and not their numerical sense. 2. Let x_i denote any value of x between a and A . Multiply A_n by x_i ; add the product to A_{n-1} ; and represent the result by r_i . Multiply r_i by x_i . add the product to A_{n-2} ; and represent the result by r_2 . Proceeding thus by Horner's method, we shall ultimately have $r_n=f(x)$. First, let $f(a, A)$ express a superior limit to $f(x)$ for all values of x between a and ft. In this case, a is greater than b; and it requires no formal demonstration to show that k_i is greater (algebraically) than r_i ; that k_i is greater than r_{i-1} ; and so on to k_n , which is greater than r_{n-1} or $f(x)$. Next, let $f(a, ft)$ express an inferior limit...
