The Water Supply Department had further stated that considerable purification takes place between 135th Street Gate House and the City Hall. At 16th Street, which is midway between the two stations, we should expect to get water that had at least half the purification that the City Hall water would show and therefore purer than at 195th Street. We are indebted to Dr. Jackson, Director of the laboratory, for these reports. We have repeatedly found that waters giving a positive result with presumptive test in.1 c.c. have given a negative result with 1 c.c. and with 10 c.c. the growth of a considerable number of varieties of bacteria interfering with the action of the colon bacilli. A presumptive test which frequently fails completely to reveal the presence of B. coli where it is a comparatively simple matter to find it by another method is certainly of questionable value, and should be subjected to rigid investigation before basing any very definite opinions on the quality of the water supply under examination. THE CHEMICAL PHASES OF...
