The sizes of eye-bar heads, and sometimes of the eye-bars, are also dependent upon the size of pin. The various steps of the calculation are interdependent, and must first be made tentatively, and then revised until accordant results are reached. It is generally convenient to assume, first, a size of pin, based on other similar designs, then the thicknesses of bearings and sizes of eye-bar heads can be determined. The packing of members is then arranged, and, finally, the stresses in the pin calculated and the exact size determined. The other calculations are then revised if necessary. Small variations in size in the different pins of the same bridge are undesirable,...
