Under the floor of the tympanic chamber runs the jugular vein on its way to the lower part of the neck. Ear disease implicating that large blood-vessel is often attended with disastrous consequences. In front of the drum-cavity, and separated from it only by a thin layer of bone, is situated another large vessel, the carotid artery, which may be affected by disease or injury involving the ear. Extension of middle ear disease may also take place through the inner wall of the cavity directly to the internal ear, and affect the structures of the labyrinth, resulting in total deafness, giddiness, or brain disease.
