

Taming Information Technology: Lessons from Studies of System Administrators (Paperback)

By Eser Kandogan, Paul P Maglio, Research Staff Member
Eben M Haber

Oxford University Press Inc, United States, 2012. Paperback.
Book Condition: New. 232 x 156 mm. Language: English . Brand New Book. Information technology is at the center of modern life. It supports most day-to-day activities: talking on the phone, getting money from an ATM, or working in the office. Whether for work, commerce, or fun, we interact with computers, networks, and databases - all sorts of information technology. How does it work? Certainly, technological advances helped create this world. But what keeps it running? The answer is people. These people - computer system administrators - are the unsung heroes of the modern age. When we notice them, it is only because something went wrong. Small failures can become big problems, and big failures can make news headlines and cost lots of money. But most of the time, things go right, and system administrators are invisible. They work out of sight, down in the data-center, twenty-four hours a day, seven days a week. But how do they keep systems running? And more importantly, how can we help make them better at their jobs? To answer these questions, the authors of *Taming Information Technology* set out to study system administrators - sysadmins,...
