It will assist them also in determining which of these Exercises to omit. While all of them will be useful for a class of good or well-developed students, it is undesirable to exact them all of the weaker ones: in general, the authors think it unwise to require any which the average member of the class cannot work out for himself, at least with a few hints from the teacher. Properly used, anything which requires original thinking of the students is the most beneficial part of a treatise; but examples too difficult, which have to be fully explained by the teacher, have no especial value. We think these considerations will be a guide to the teacher in the selection of the exercises which he assigns to his students.
